

# WAKE THE DEAD

## STILL BURNING CD / LP (IGN279)

Wake the Dead from Marseille live by a simple credo - "Drive for hours to play for half an hour". In the last decade WTD have played more than 320 shows in over 30 different countries from Europe to Asia and have shared stages with bands like Sick Of It All, Propagandhi, No Use For A Name, A Wilhelm Scream and Death By Stereo.

Passion, integrity and energy lie at the core of everything that Wake the Dead do, and each and every song that they write about their collective experiences and the highs and lows of everyday life is bursting with the kind of sing-a-long choruses that make believers out of Hardcore kids and fire up pits the world over.

Ten years into their journey, Wake the Dead have found a new home with Engineer Records and are about to unleash their new album *Still Burning* on a world that isn't prepared for what's about to hit it. Are you ready for Wake the Dead? Are you ready to sing-a-long with *Still Burning*? Are you sure? Then strap yourself in, hold on tight and let's begin...
